Written by Gillian Rozenberg, *Microscopic Haematology 3e* provides a wealth of information on haematology including over 400 full colour haematology slides and 30 detailed haematological case studies. There is also expanded coverage of blood cell production, haematopoiesis, disease physiology and a thorough paediatrics section.

*Cases in Microscopic Haematology* is an excellent companion providing 80 additional cases and 20 annotated virtual slides to simulate the laboratory process.
